

READ THIS !

The Following sheets contain way more detail and info than many venues need.

Ultimately, all Mark needs to perform is a room with a 2 channel sound system and some basic lights.

For gigs within a 8 hour drive of Charlottesville, Virginia Mark only needs a place to perform and can bring and run EVERYTHING ELSE.

These pages are designed as a guide to help reduce tech time and make the process easy for all parties.

Remember Mark is VERY FLEXIBLE and can adjust to ANY situation and equipment available.

Look forward to working with you.

OPTIONAL

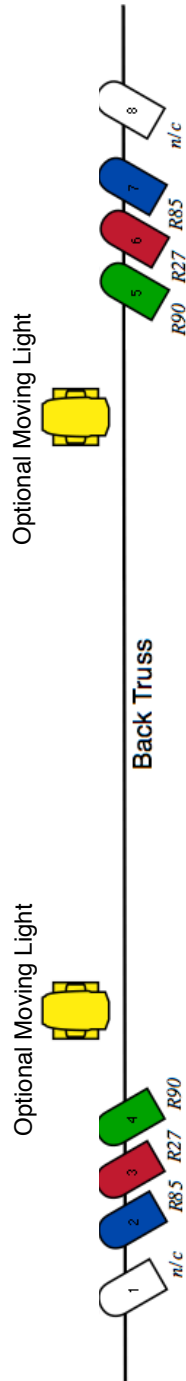

OPTIONAL

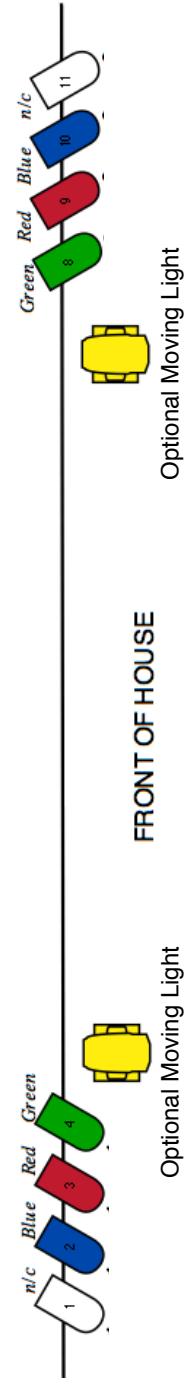

Light Plot

STAGE
LEFT

NOTE: This light plot is a basic idea of what is needed. Mark can adapt to ANY situation depending on your budget and what is available at the event. Mark will run light cues via his computer, normally via DMX. If there are moving lights he will trigger the board via Midi Show Control (MSC). All modern lighting boards support this feature. If there are additional lights available that are not shown on this plot Mark may use them to build the looks used for the show. In some cases Mark will bring lights with him and this plot will not be needed.

STAGE
RIGHT

NOTE: Please try to keep FRONT LIGHT off the CYC or movie screen.
